HooksClass.addScreenshot(io.cucumber.  
java.Scenario)

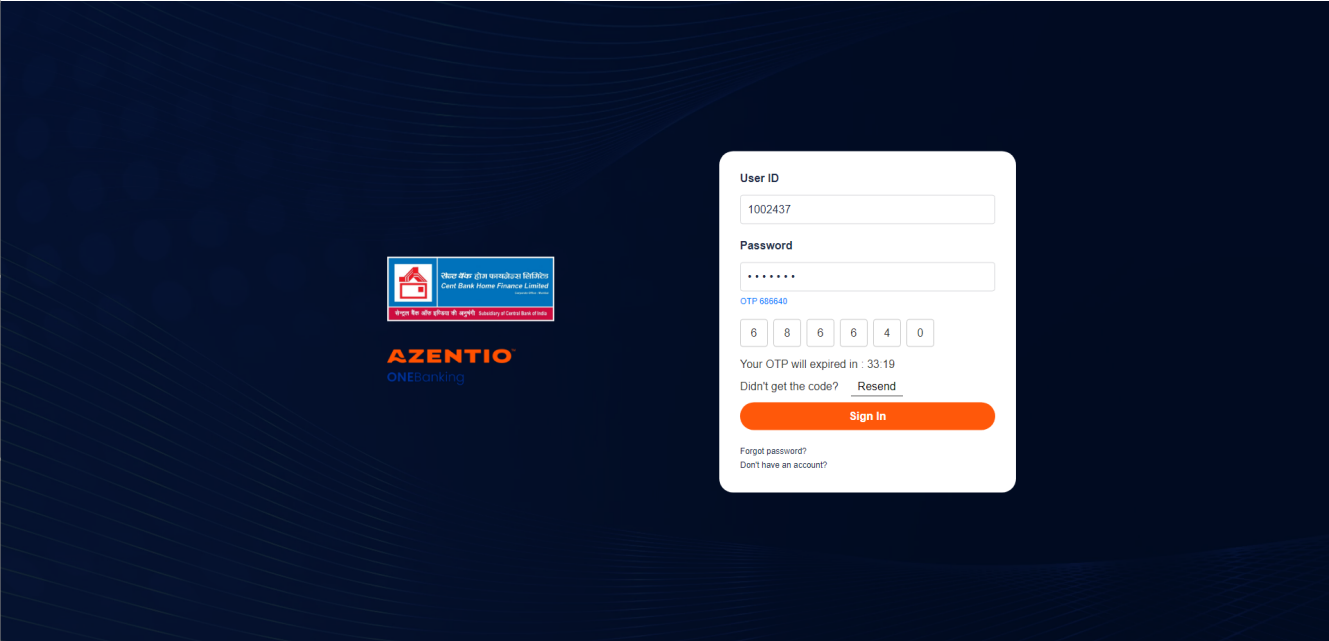

(S) Create Employee Limit for checker  
approval

(F) to verify user can able to do  
transaction in petty cash module

The screenshot shows the Azentio ONEBanking interface. The top navigation bar includes the date '21-Nov-2022', language 'English', and software version 'Azentio Software (AZENTMAIN)'. The main header is 'Employee Advance Limit' with a back arrow and action buttons: 'ViewSummary', 'Approve', 'Return', and 'Reject'. Below the header, there is a table with columns: Employee, Advance Limit, and Status. The table contains one row with the following data: Employee 'IND0945 - Krutika Madhavi', Advance Limit '10,000.00', and Status 'ACTIVE'. The left sidebar contains a 'Configuration' dropdown, 'Security management' with a clock icon, and 'Open pool' with a clock and checkmark icon. The bottom status bar shows '22 Appro...' and '11 Mess...'.

(Step) AFTER\_STEP - stepdefinitions.  
HooksClass.addScreenshot(io.cucumber.  
java.Scenario)

(S) Create Employee Limit for checker  
approval

(F) to verify user can able to do  
transaction in petty cash module

This screenshot is identical to the one above, showing the 'Employee Advance Limit' configuration page. However, a green success message banner is visible at the top right, stating 'Record approved successfully' with a close button. The table data remains the same: Employee 'IND0945 - Krutika Madhavi', Advance Limit '10,000.00', and Status 'ACTIVE'. The sidebar and bottom status bar are also consistent with the previous screenshot.
